[Eckerd Connects]

Eckerd Connects is a non-profit organization committed to not only providing the solutions that help struggling families thrive, but also sharing these solutions with others. Originally founded in Florida in 1968, they now provide a variety of programs and services in over 150 sites nationwide.

Project Description

Using internal data sources from Eckerd Connects, HDAG would help to determine factors contributing to effective recruitment and retention for Job Corps, a program that provides education and career training to low-income individuals. Specific project tasks may include

1. Exploratory analysis to determine students' prospects when entering the program, factors contributing to success, reasons for leaving, etc.
2. A dashboard for monitoring students during the program and shortly after leaving (90 days)

Internal Partners: Chief Operating Officer, Vice President

Datasets: Internal Data

Coding Languages: Python

Specific Skills
1. Data visualization
2. Dashboarding

Expected Technical Difficulty: **Easy/Medium**
